

AQUA TETHER™

Mounting and Attaching

1. Select a location in the spa where the chemical dispenser or mineral purifier will get water flow but not be lodged against the skimmer creating over suction and chemical depletion.
2. Attach the **Wet-Set Anchor** to the wall of the spa above or below the water line, making sure the **opening in the clip is facing upwards**.
3. Secure the string end of the tether through the hole in the chemical dispenser and loop the silicon end through (**see examples below**).
4. Snap the **Silicon Tether** into the clip on the **Wall Anchor**.

Most tablet dispensers and mineral purifiers have a hole to loop the tether through.

The hole on the @ease Spa version is only noticeable from underneath without the SmartChlor® attached.
