

3-Step Program

1.2.3

The ultimate cold plunge system!  
Following the ICE Program ensures  
clean, clear, healthy water.

## ICE MINERAL CUBE

The ICE MINERAL CUBE works in conjunction with regular draining and cleaning using ICE CLEAN (Step 1) and the use of ICE TREATMENT (Step 3) whenever the plunge tub is filled with water.

- ICE Minerals reduce the amount of chemicals needed.
- ICE Minerals reduce harsh odors and scum lines.
- ICE Minerals reduce eye and skin irritation.
- ICE Minerals last six months.

### Directions For Use:

1. Fill the plunge tub with water.
2. Using an accurate test method, test the water for pH. The ideal pH level is between 7.2 - 7.6 ppm. Adjust if needed using Mineral Harmony LIFT or Mineral Harmony LOWER.
3. Place the ICE MINERAL CUBE in the filter, skimmer, or footwell of the plunge tub.

Weekly:

1. Add 4 ounces of ICE TREATMENT (Step 3) per 50 gallons of water.
2. Test pH levels and adjust as needed.

Every 6 Months:

Replace the ICE MINERAL CUBE

## CAUTION

**KEEP OUT OF REACH OF CHILDREN**

### PRECAUTIONARY STATEMENTS

Hazardous to humans and domestic animals. In the event that a cartridge is compromised, minerals should not be ingested as they can cause gastric distress.

### FIRST AID

If ingested, immediately call the Poison Control Center or a doctor for treatment advice.

### STORAGE/DISPOSAL

Store in areas inaccessible to small children. Dispose of cartridge in trash after six months of use. Do not save or re-use. In the event a cartridge is compromised, remove the cartridge and vacuum any remaining particles from the water.

Active Ingredients:

Silver Nitrate . . . . . 1%

Other Ingredients . . . . . 99%
